Since 2016, we've paired our flagship Long Term Trade Reports (by Marius Landman) with our proprietary Elliott Wave Algorithm - giving you the complete macro picture plus pinpoint timing.

Our in-house Bitcoin Algorithm scans massive historical data to identify repeating fractal patterns and cycle phases with up to 98% accuracy in long-term moves. We then overlay classic Elliott Wave structure so you get crystal-clear, easy-to-follow charts that show exactly where the market is headed - often weeks or months ahead.

What you receive every week:

- 2-3 in-depth PDF reports + video updates (with at least one video per week)
- Precise Elliott Wave charts showing cycle tops, bottoms, and high-probability price targets
- Clear entry, exit and profit-taking levels on both macro weekly charts and shorter-term 4-hour charts
- Access to our growing library of training videos, private blog posts, and Telegram alerts
- Weekly live Zoom calls for Q&A (when markets are active).

Whether you're a long-term investor, swing trader, or even day trader looking for the bigger picture, these reports remove the guesswork and give you the confidence to trade the real market cycles, not the noise.
